SUMMARY

- Product engineer with **12+ years** shipping web, mobile and WordPress products end to end, with deep fundamentals in **TypeScript/JavaScript, PHP, Swift and SQL**.
- **AI-first workflow, daily for 2 years:** Claude Code, Cursor, ChatGPT and Ollama across prototyping, UI mockups, test generation, refactoring and code review.
- Shipped **4 apps solo in 18 months** to the App Store, Mac App Store and Google Play, plus **10+ prototypes and web products**; one went from first commit to the App Store in a week.
- Maintain WordPress plugins on **10,000+ active sites** (540k+ downloads); have **hired and led a remote team of 6**.

EXPERIENCE

LAZYCODELAB · REMOTE

Founder and Product Engineer

Nov 2019 – Present

- Grew freelancing into a remote studio: **hired and led a team of 6**, delivering concurrent client projects.
- Restructured into a lean **productized service** focused on hands-on engineering: **white-label iOS, Shopify and web development** for agencies.
- **AI-accelerated delivery** (Claude Code, Cursor): ship client MVPs and rescue stalled or AI-generated apps (Lovable, Bolt) without months of iteration.

HYPEFLAGS · REMOTE

Core Developer

2020 – 2023

- Built **two custom product designers** in a Shopify theme and an **order-management system** outside Shopify.
- **Replaced paid third-party apps** with in-house code and shipped a checkout upsell that **lifted sales ~13%**.

SAGMETIC INFOTECH PVT. LTD. · MOHALI, INDIA

PHP Team Lead

Aug 2017 – Oct 2019

- First employee; helped grow the company from founding to **~13 people**.
- **Led a PHP team of 3** (architecture, code review, delivery); scoped and estimated projects with the founders.

SELF-EMPLOYED · UPWORK, FIVERR, FREELANCER · REMOTE

Freelance Software Developer

2013 – 2019

- Delivered **45+ client contracts**: WordPress plugins and themes, Shopify stores and migrations, custom PHP apps.
- Grew one engagement into a **6-year product partnership** (CSS & JavaScript Toolbox).

PROJECTS

Mudo: Anxiety & Mood Tracker

Oct 2025 – Present

Privacy-first iOS mood tracker, **live on the App Store** (now v2.14) and built solo with an AI-assisted workflow. **On-device AI insights (Apple Foundation Models)** behind a quality gate, iCloud sync via **CloudKit**, **WidgetKit/App Intents**, and subscriptions migrated from StoreKit 2 to **RevenueCat**.

Case study: lazycodelab.com/case-studies/mudo.pdf

WP Snippets AI
Oct 2024 – Present

AI-native WordPress snippet manager, engineered solo for a commercial joint venture: **4 LLM providers** behind one factory with **rate limiting and caching**, PSR-4/DI architecture, versioned **REST API**, React admin.

Case study: lazycodelab.com/work/wp-snippets-ai

CSS & JavaScript Toolbox
Nov 2019 – Present

Core maintainer of a plugin on **10,000+ active sites (540k+ downloads, 96/100 rating)**; took it from v9.4 to v12 without breaking existing sites. Also maintain CJT PLUS.

Case study: lazycodelab.com/work/wp-snippets-ai

Gita Essence: Daily Verse
Apr 2025 – Jul 2026

Daily-verse app **live on the App Store and Google Play**. Shipped v1 in **SwiftUI** a week after first commit, then rebuilt it cross-platform in **React Native/Expo** with **Claude Code** in 7 weeks, adding **RevenueCat** subscriptions.

Quotle
Jan 2026 – Jun 2026

Daily quote-guessing word game **live on the App Store and Google Play**: Expo/React Native/TypeScript, offline-first, **RevenueCat** subscriptions. Built with **Claude Code** behind **GitHub Actions** gates (lint, typecheck, Jest coverage threshold, nightly flaky-test run).

Heckle: Dev Focus Monitor
Dec 2025 – Feb 2026

macOS desktop companion that keeps developers on their toes with jokes and interruptions; **shipped to the Mac App Store** 6 weeks after first commit. SwiftUI, AppKit, Combine.

Actionify
Apr 2026 – May 2026

AI web app that turns a brain-dump into an ordered task checklist: **multi-provider LLM fallbacks** (Gemini, OpenAI, Anthropic), **Lemon Squeezy** credit billing, **Supabase** auth. Next.js, TypeScript, Tailwind CSS.

CheckMate
Sep 2024 – Mar 2025

AI fact-checking Chrome extension **live on the Chrome Web Store**, with source-credibility scoring and its own API and dashboard. TypeScript, React, Chrome Extensions API, OpenAI.
